SAYED AHMED HUSAIN

Full-stack Developer | Electrical Engineer

Nationality: Bahrain
Qualification: Bachelor Degree
Mobile: +97333115351
Email: sayedahmed97.sad@gmail.com
LinkedIn: linkedin.com/in/97ahm
Portfolio: sahmedhusain.github.io/me

SUMMARY

Electrical Engineer transitioning to Full-Stack Development with a strong focus on building secure, scalable web applications. Proficient in **Go (Golang), Next.js, React, and TypeScript**, with hands-on experience developing real-time solutions using **WebSockets**. Also skilled in **Rust** for systems programming. My background in highly regulated industries—specifically Fire Safety—instills a disciplined approach to reliability and performance. While engineering documentation focuses on regulatory compliance, I apply that same rigor to software documentation, ensuring clarity in system architecture and technical workflows. Furthermore, my experience in Business Development and Administration at LIFECO, combined with my background in the telecom sector at Zain Bahrain and Channels by STC, has enhanced my understanding of market dynamics and customer-centric solutions.

Passionate about bridging the gap between engineering precision and modern software architecture, I am committed to driving digital transformation through innovative full-stack solutions. Leveraging dual expertise in electrical engineering and software development, I create efficient applications that address complex real-world challenges while ensuring robust performance.

TECHNICAL SKILLS

- **Languages & Backend:** Go (Golang), SQL (SQLite), Python, JavaScript (ES6+), TypeScript.
- **Frontend & Web:** Next.js, React, HTML5, CSS3, Tailwind CSS, PWA (Progressive Web Apps).
- **Systems & Tools:** Docker, Git, WebSockets, REST APIs, GraphQL, OAuth2, JWT, Postman.
- **Concepts:** Algorithms, Data Structures, Concurrency, System Design, Agile Methodologies.

KEY TECHNICAL PROJECTS *(Full portfolio available at: sahmedhusain.github.io/me)*

GigaBit – Real-Time Social Network | *Go, React, Next.js, SQLite, WebSockets*

- Built a full-stack social platform featuring live messaging, threaded comments, and role-based permissions, utilizing WebSockets for real-time updates and SQLite for relational data management.

ConnectHub RT – Real-Time Forum | *Go, HTML/CSS, JavaScript, WebSockets*

- Developed a concurrent discussion platform enabling instant updates for comments and chat, leveraging Go's concurrency model for high-performance connection management.

01 Dashboard – Learning Analytics | *React, TypeScript, GraphQL*

- Created a visual analytics dashboard integrating third-party APIs via GraphQL to track and display complex learning data with responsive UI components.

PROFESSIONAL EXPERIENCE

- **Public Relations In-Charge** *May 2024 — February 2026*

  Lichfield Fire and Safety Equipment Co., Ltd. | Bahrain / UAE
  - Managed tender submissions and vendor pre-qualifications for government entities, ensuring strict adherence to compliance.
  - Analyzed market data and economic indicators to optimize operational strategy and report to corporate stakeholders.
  - Led sales teams and formulated strategic plans to secure high-value contracts with public and private sectors.

- **Electrical Engineer** *October 2022 — October 2023*

  Super Fire and Safety Services W.L.L | Bahrain
  - Designed fire safety systems compliant with NFPA and GCC codes for high-value projects like ALBA and Bahrain Steel.
  - Directed technical teams in installation and testing to ensure 100% adherence to safety protocols and EWA regulations.
  - Conducted rigorous quality assurance inspections to meet strict engineering performance standards.

- **Retail Sales Specialist** *April 2022 — September 2022*

  Channels by STC | Bahrain
  - Managed complex customer inquiries and data using Oracle CRM enterprise systems to ensure high satisfaction.
  - Executed cross-selling strategies for telecommunications products, consistently meeting sales targets.

- **Retail Marketing and Customer Service** *February 2019 — March 2022*

  Zain Bahrain B.S.C | Bahrain
  - Optimized branch operations and sales team performance to consistently exceed company targets.
  - Resolved high-volume technical claims and service issues to minimize customer downtime.

EDUCATION

Full Stack Development Specialized Program (High Diploma)

Reboot01 Coding Institute, Bahrain | March 2024 — March 2026

Bachelor of Science in Electrical Engineering

University of Bahrain, Bahrain | June 2022

LICENSES & CERTIFICATIONS

- **Licensed Engineer:** CRPEP (Electrical) & EWA Installation License (Bahrain)
- **Technical Certifications:** NOCN Level 3 Solar PV Installer
